Herit - Data Project

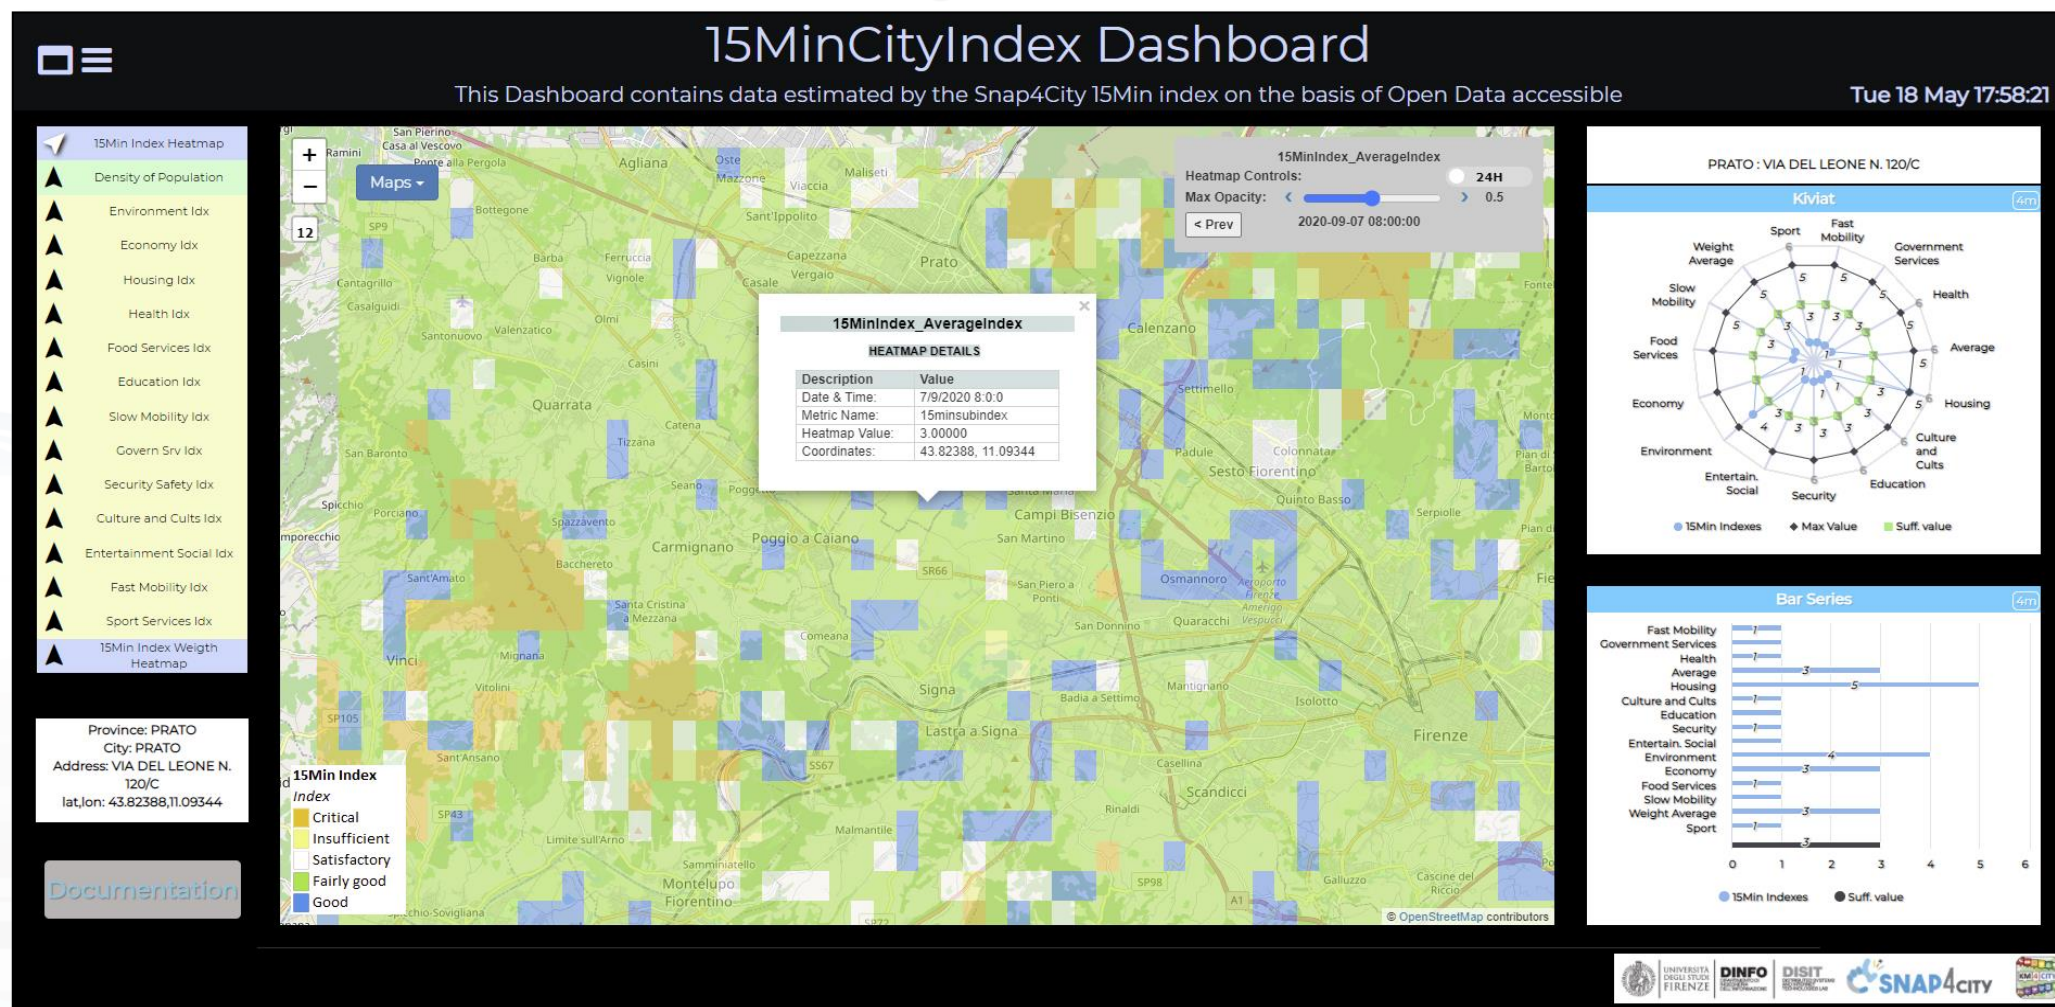

Tourism is a major engine of **economic growth** but at the same time it has a **great impact on the conservation of cultural and natural heritage**, hence it requires a more careful and advanced management, especially in terms of flows, and is unavoidably linked to the big and open data available. **HERIT-DATA** project, following these needs, aims to a **better analysis and management of anthropic activities and impacts on cultural heritages**, by means of **ICT technologies and data**
