

ONE PLATFORM. THREE MOBILE APPS. ANY CITY SERVICE.

Distinct mobile experiences for citizens,
enforcement teams and waste collection operators

All connected to Snap4City platform

Multiservices CITY USER APP

Parking, payments and permits.
Reports and local waste information.

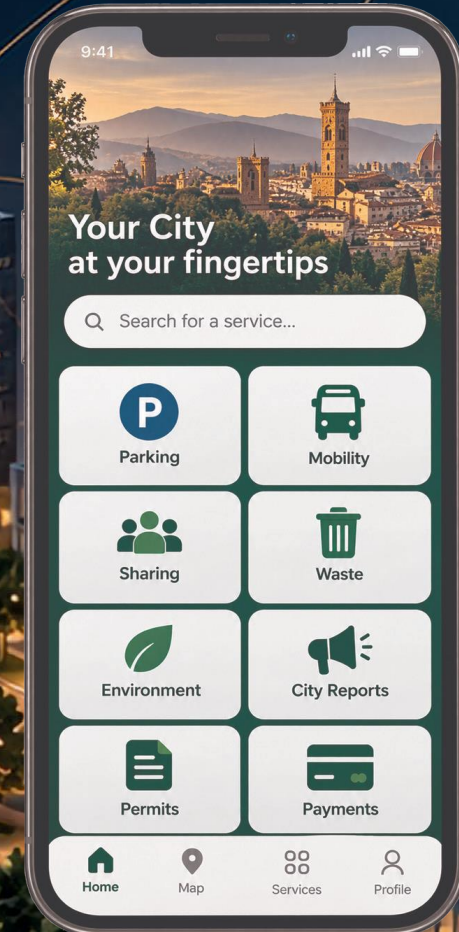

ENFORCEMENT APP

Check parking, verify permits,
issue fines and print tickets.

WASTE COLLECTION APP

Truck navigation, dynamic routes and
collection progress.

A rich portfolio of mobile apps with flexible configurations and service combinations covering key Smart City needs.

SMART PARKING

Make parking part of a seamless urban journey.

ENVIRONMENT & URBAN INFORMATION

A multiservice application can also become a window onto the urban environment.

MOBILITY & POI

Combine different mobility options within the same city interface.

DIGITAL PERMISSIONS & ACCESS RIGHTS

Municipal permissions become part of the user's digital profile.

SHARED MOBILITY & CAR POOLING

The same mobile ecosystem to support innovative sharing services.

CITIZEN PARTICIPATION

Turn citizens into active participants in improving their city.

PAYMENTS & FINES

Bring municipal transactions into the same digital environment.

PERSONALIZED NOTIFICATIONS

To deliver information at the right moment.

POLICE & ON-ROAD OFFICERS

Parking enforcement and permit verification directly in the field.

SMART WASTE COLLECTION

Turn the vehicle tablet into a data-driven collection assistant

SMART TOOLS FOR CITY OPERATORS

Extend the Smart City mobile experience from citizens to field operations.

SMART CITY / CONNECTED MOBILE SERVICES

<https://www.d-ai.eu>

Multi Service Mobile Apps

- Parking
- Permissions
- Notifications
- Payments
- Participations
- Environment and Weather
- Monitoring: Waste, services
- Points of Interests
- Info Mobility
- Etc.

ONE PLATFORM. THREE MOBILE APPS.

Connected services for citizens, enforcement and waste collection.

CITY USER APP

Everyday services, in your pocket.

- Find parking, navigate and pay
- Permits and subscriptions
- Reports, alerts and notifications
- Nearby bins and local information

Connected city services

ENFORCEMENT APP

The full picture, in the field.

- Check plates, spaces and permits
- Capture evidence and issue fines
- Print tickets and send reports
- Work online and offline

Connected to Snap4Parking

WASTE COLLECTION APP

Collection intelligence, on the road.

- Follow planned and dynamic routes
- View bin details and fill levels
- Track stops and collection progress
- Record photos and service issues

Connected to Snap4Waste + Snap4Fleets

All connected to the Snap4City platform.

Shared city data • Back-office coordination • Multiple municipalities

For city users

- Parking discovery and guidance
- Permits and subscriptions
- Parking and fine payments
- Complaints and notifications
- Waste bin monitoring

For On road Operators

- Live monitoring of slot to be verified
- Enforcement, fine emission and printing
- Connection with fine management system
- Reporting

Waste Collection on truck Operators

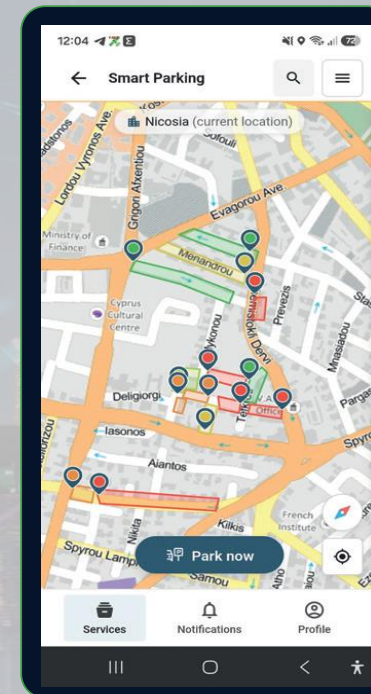

- Optimal following routing
- Monitoring waste collection status and KPI
- Dinamical routing for small collection trips

Multiple municipalities can share the same platform

Bring city services into everyday life.

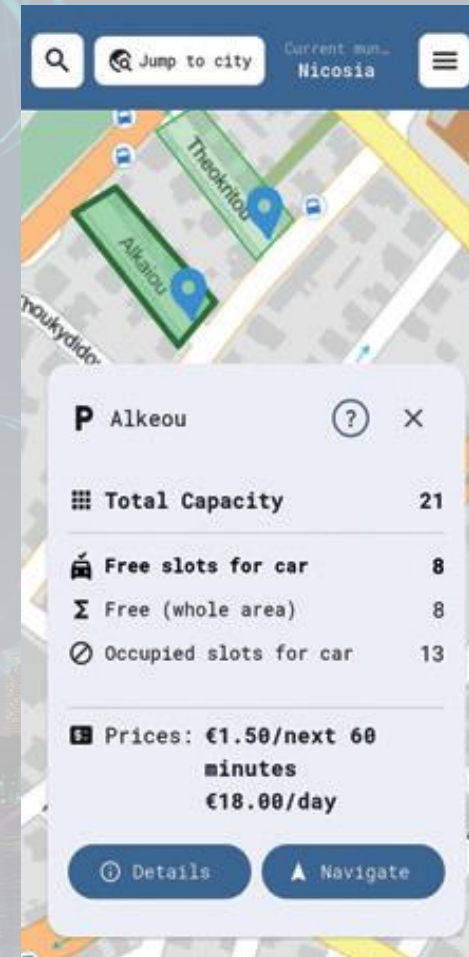

For city users

- Parking discovery and guidance
- Permits and subscriptions
- Parking and fine payments
- Receive alerts
- Retrieve your car
- Complaints and notifications
- Locate nearby waste bins
- Many other services: environment, etc.
- **Connected with:**
 - Snap4City, Snap4Parking, Snap4Assets, Snap4Environment, etc.

The driver experience

- 01 Find suitable parking**
View spaces by area, user profile and vehicle.
- 02 See availability and rates**
Check live status and parking predictions.
- 03 Navigate and pay**
Follow routing and use the available payment model.
- 04 Stay informed**
Receive alerts before parking time expires.

Permissions and subscriptions

Access rules by user profile and vehicle

Support residents, visitors and people with disabilities.
Include delivery, commercial and municipal operators.

Apply permissions to parking services and access to restricted areas.

The mobile app presents permit validity and the relevant parking area.

Payments through the channels users need

Payment channel	Supported use
Mobile wallet	Payments through the Snap4City Mobile App
Credit card	Card payments for parking services
Parking meters	On-street meters and off-street entrances
Automated payment	Plate or RFID recognition, where configured

Parking and fine payments can connect to city payment portals and ERP systems.

Complaints and citizen engagement

City users can submit reports through the multi-service app.

Complaint history keeps submitted reports visible.

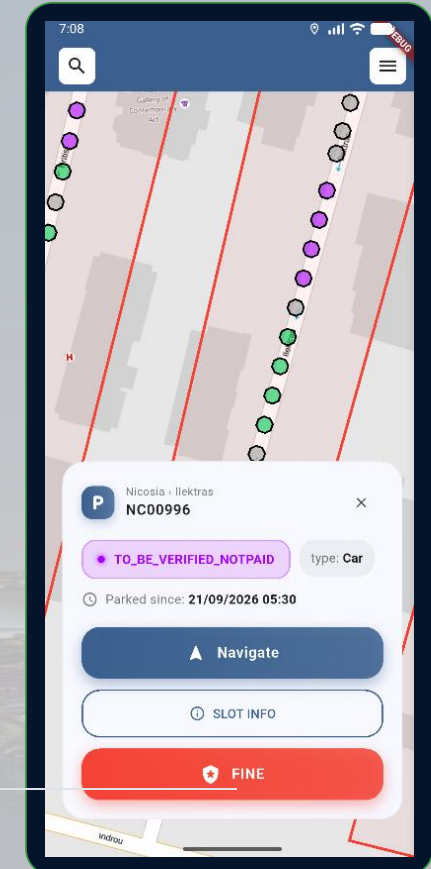

Notifications and operator messages provide updates.

Parking feedback within a wider city reporting service

Give field teams the full picture. For On road Operators, enforcement

- Live monitoring of parking slots to be verified
- Plate verifications
- Slot verifications, slot status filtering
- Permits verifications
- Enforcement, fine creation with photographic evidence and fine printing
- Connection with fine management system, back-office coordination, reporting
- On-line, off-line working
- **Connected with Snap4Parking**

Enforcement connected to the back office

Help field teams identify where intervention is needed.

Review unpaid parking, overstays and permit violations.

Navigate to a space and issue a fine. Attach photos or video and print a ticket.

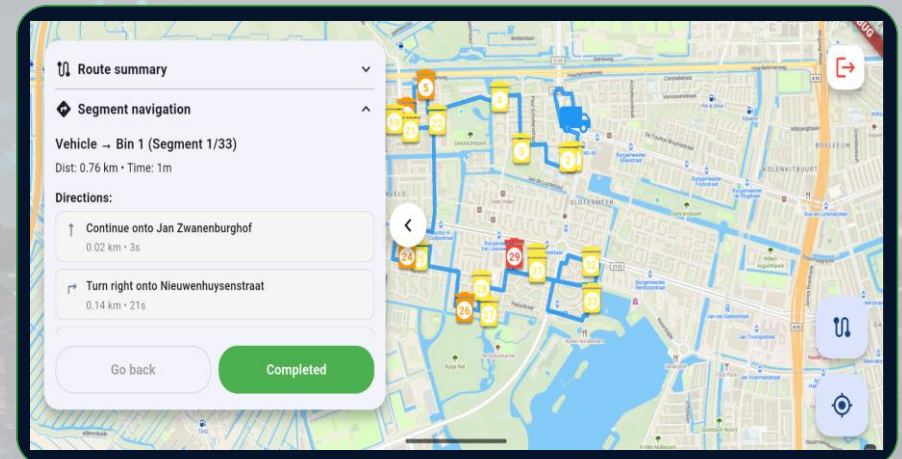

Back-office teams monitor field activity and coordinate operator deployment.

Put collection intelligence on the road.

Waste Collection on truck Operators

- Planned routes and dynamic routing by bin filters.
- Optimal following routing
- Fill-level data, bin details and navigation.
- Monitoring waste collection status and KPI
- Dinamical routing for small collection trips
- Completed stops and remaining collection work.
- **Connected with**
 - **Snap4Waste and Snap4Fleets**

Collection based on actual need

Fewer unnecessary collections

Prioritize bins that need service.

Earlier overflow warnings

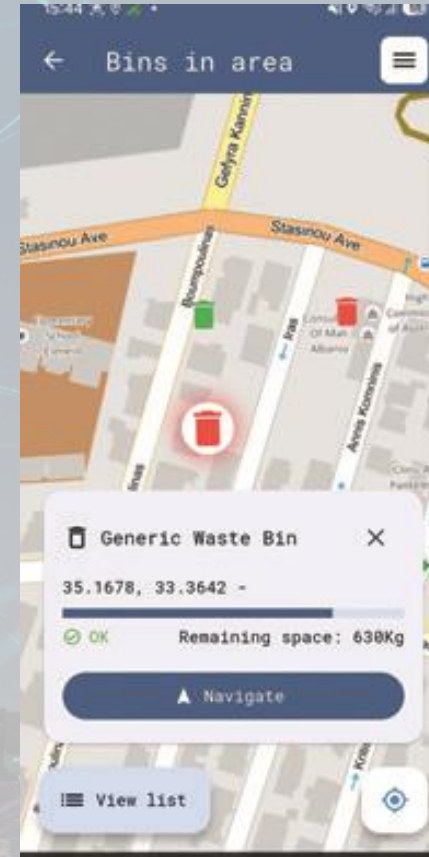

Anticipate fill levels and flag critical conditions.

Clearer proof of service

Track vehicles and record collection activity.

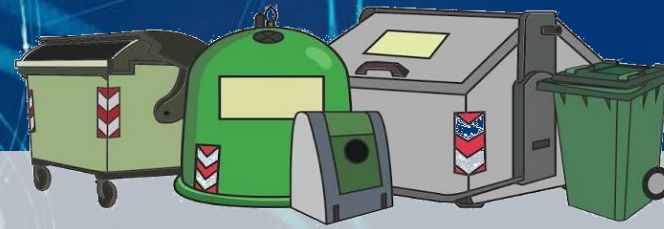

More informed operating decisions

Assess routes and service performance with operational KPIs.

Mobile view of local bins

Field teams follow the plan

Assigned collection jobs

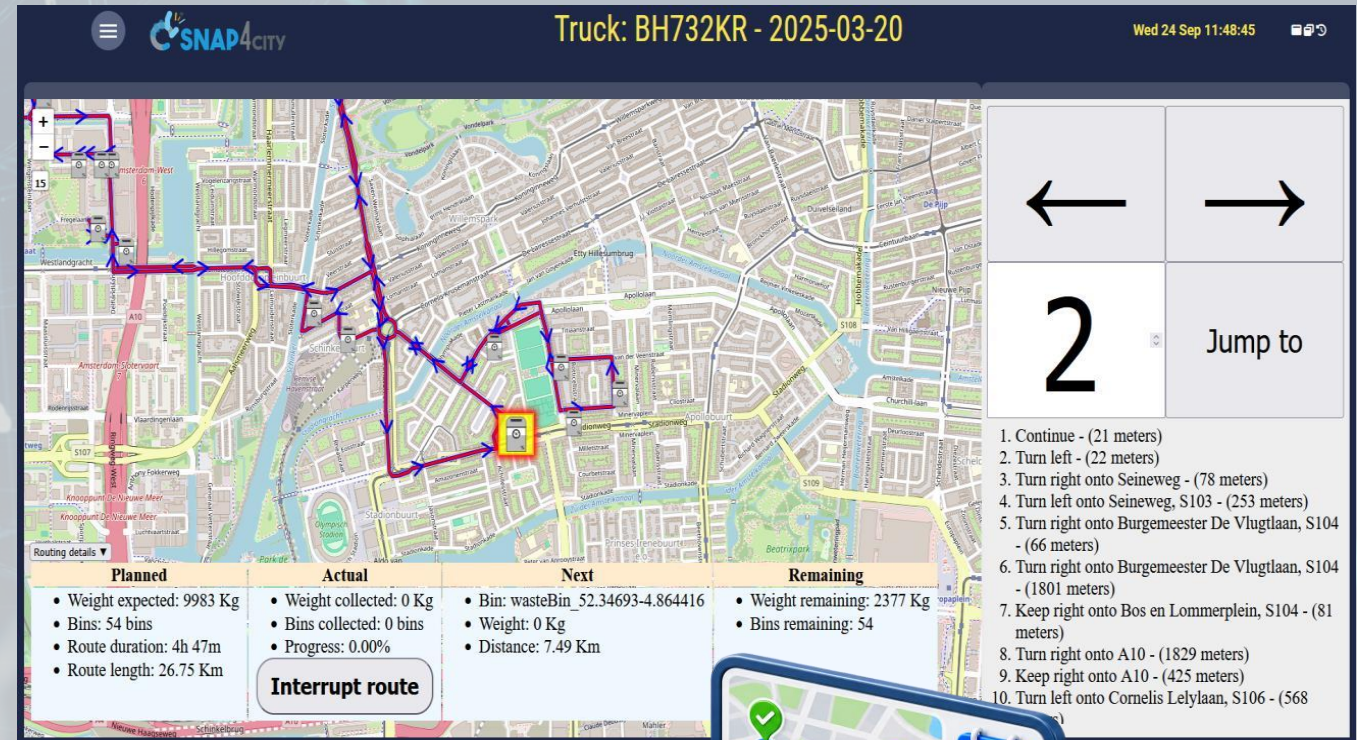

Send planned routes to the truck driver or operator app.

Navigation and progress

Guide the route and monitor planned, collected and remaining work.

Service records

Capture collection evidence, photos and issues from the field.
