- ✓ **12+ years** as a provider of products for Smart Street lighting
- ✓ **50+ Cities** served in Sweden and Finland

2017 we started new product development

- ✓ Since 2017 invested more than 1 MEUR in development for extending to smart city and massive IoT wireless technology
- ✓ Seeking investors/owners to grow our operation for a commercialization and marketing phase

THE PROBLEM

URBANISATION

growing & aging
population

Must tackle

- Inefficiencies within City Operations
- High Energy Consumption
- Sustainability and Environmental Requirements
- Safety for its citizens
- Be attractive for citizens and businesses

IoT Boom

Driving the cities towards
Digitalization and
Smart City solutions

Smart Streetlights

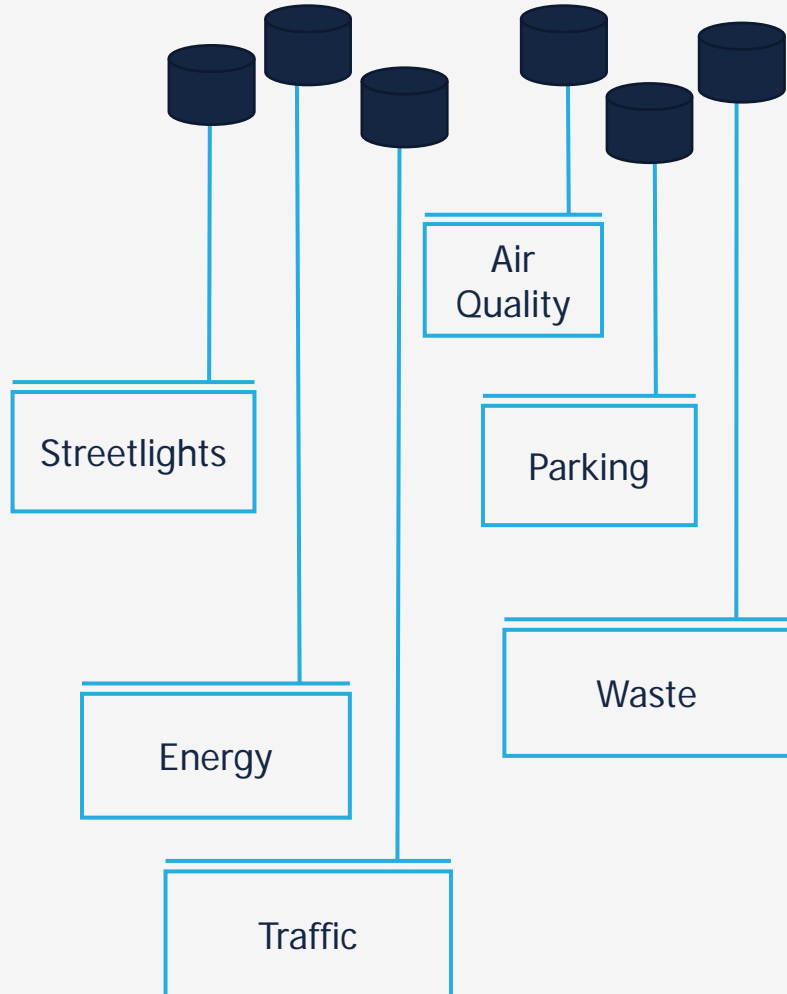

A pillar for smart cities

Not only light anymore, must consider smart city IoT

SILOS

- Cities attempt various solutions but ends up with many separate systems (SILOS)
- Prevents efficiency and smart solutions when data is not accessible horizontally

City

TOWARDS SMART CITY 2.0

Problem: SILOS and Decision Making

- Technologies are **DISCONNECTED**
- Technologies are **MANAGED SEPARATELY**
- Separate budgets are assigned to smart city projects within municipalities and **HIGHER CAPEX**
- Separate municipality departments, decentralised decision-making, **OVERLAPPING OR CONFLICTING GOALS**
- **NO INTEROPERABILITY** of technologies
- The City wants to proceed towards a Smart City but there are difficulties to take **DECISIONS** due its central position in the city

CONNECTED STREETLIGHT BOOM: THE MARKET OPPORTUNITY

Smart and Connected Streetlights accelerate Smart City Development

TECHNOLOGY

- ✓ **IoT** technology boom increases number of streetlights to be connected
- ✓ **Connected Streetlights** is a fundamental pillar for Smart City
- ✓ **New standards** promotes a wide use of connected streetlights
- ✓ Connected Streetlights provides an **IoT Device infrastructure** for a smart city

MUNICIPALITIES

- ✓ **Urbanization** requires smart city IoT solution and promotes **smart street lighting**
- ✓ **Savings** through higher city operational efficiency and lower energy costs
- ✓ **LED luminaries** and standards for **smart luminaries** promotes connected streetlight

EFFICIENT CITY

- ✓ Inefficiencies in the city affect the **economy**
- ✓ **Growing & aging** city population
- ✓ Quality of life
- ✓ New trend for **direct government** with citizens
- ✓ **Environmental** concerns

OUR SOLUTIONS

GREENSTREET IoT

Smart street lighting based on massive IoT RF mesh communication providing the city an infrastructure for various other IoT sensor and thus promoting other smart city solutions.

A nighttime photograph of a city street scene. In the foreground, a curved metal guardrail runs along a road. In the background, a bridge with a metal railing spans a road. Beyond the bridge, a city skyline is visible under a dark blue sky. Several construction cranes are visible in the distance. A building with a sign that reads "TETOTALO" and "Arrend print" is illuminated. Streetlights are visible, casting a glow on the scene.

MORE RANGE.

MORE RELIABILITY.
